Chamblee, Georgia

Dr. Joshua Lederberg
Department of Genetics
The University of Wisconsin
College of Agriculture
Madison 6, Wisconsin

Dear Dr. Lederberg:

Many thanks for your letter of January 16. We are looking forward to your visit. As to equipment, I think you had better bring the 70 mm Petri dishes since we have none here. Any other specialized equipment either should be brought or you should write about it as soon as possible. I think we can supply most of the standard equipment needed. It might be well to bring any pet loops and needles which you have since one often has difficulty adjusting to new ones, more or less as one becomes accustomed to a fountain pen.

If there anything we can do toward finding a place for you to stay we would be happy to try. Did you have any particular type of accommodations in mind? If you are driving through, a motor court might be more convenient than a hotel. I do not know whether we could find an efficiency apartment on a short term basis, they are hard to find.

With best wishes, I am

For the Officer-in-Charge, Bacteriology Section

Sincerely yours,

Philip R. Edwards, Ph. D.
Bacteriologist-in-Charge
Enteric Bacteriology Unit
